ABOUT US

Light Moon Electromechanical Works LLC is a well-known construction company established in United Arab Emirates since year 2013. Light Moon started 10 years ago as a specialized Electromechanical contracting company capable of executing large size MEP projects.

The building construction industry as well as the infrastructure / industrial sector is constantly growing in the UAE and Light Moon Electromechanical Works LLC was established to address this demand and is rapidly becoming one of the well-recognized companies in the industry.

LIGHT MOON works to the highest standards of MEP installation, thus, satisfying the intent and spirit of the design. Each project is a never-ending responsibility for us, the Partners and the Management Team's commitment have contributed to the impressive accomplishments of the company so far.

OSAMA DMEDI
GENERAL MANJER

VISION AND MISSION

Vision

To specialize exclusively in comprehensive MEP contracting works, leveraging the latest technologies and industry best practices, while delivering professional project management services that are integral to our partners' and clients' success.

Mission

To become a distinctive and independent MEP contractor, delivering modern, high-quality, and professional services that encompass the full spectrum of MEP requirements, while continuously embracing the latest technologies and innovations in the MEP industry.

OUR STRENGTH

Light Moon has a professional team of highly qualified engineers and designers who undertakes multiple projects and completes them successfully and on time using project management skills and experience that achieve excellence in quality, safety, and customer satisfaction.

Light Moon is a dynamic company and can adapt to the ever changing and growing needs of our customers by providing value-engineering and redesign services that results in cost saving without compromising performance, quality, and safety. Our engineering team has successfully implemented various value engineering works which was highly appreciated by our customers and consultants.

THE COMPANY

WE HAVE

15+

Years in Business

Efficient management team comprised of highly qualified and experienced team with over 15+ years of experience in the gulf region

7

design & construction engineers

Over 7 design and construction engineers in charge of, electrical, Mechanical, plumbing and HVAC disciplines.

- Vast number of CAD operators
- Highly qualified technicians performing specialized in Electrical & Mechanical Works
- An experienced team in charge of banking and project financing
- Vast fleet of construction equipment, machinery, vehicles and workshops
- Capital has been increased to serve the growing needs of business
- Excellent relationship with various banks for Project Financing requirements.

Light Moon is structured to conceptualize, design, engineer, procure, construct and commission complex projects on turnkey basis.

Light Moon uses advanced and systematic approach in the execution of projects from pre-award phase, development of conceptual designs, pricing, proposal preparation, bid submittal and negotiations, value engineering, until the final phase of engineering, procurement, construction and commission Its manpower, plant and equipment, systems resources coupled with its project management capabilities has ensured success in the execution of all types of projects and customer satisfaction.

WHAT WE DO

The company's advanced IT infrastructure is a key driver and enabler in managing and tracking progress of projects proactively and efficiently.

LIGHT MOON has an excellent relationship with various banks in dealing with various financing requirements of the projects.

It has adequate resources, years of experience in the Middle East, proactive and dynamic management which contributed towards our success in delivering projects to the satisfaction of our valued clients.

Senior management of LIGHT MOON has wide experience and has successfully completed major landmark projects in various cities in United Arab Emirates.

PROJECT MANAGEMENT

LIGHT MOON Company undertakes multiple projects and completes them successfully and on time using project management skills and experience that achieve excellence in quality, safety and customer satisfaction.

Our organization is structured to cater the demands and requirements of its projects using advanced and integrated applications in the multi-faceted phases of planning, executing, coordinating, engineering, monitoring, controlling and handing over the projects on time

ENGINEERING

LIGHT MOON has a professional team of highly qualified engineers and designers who handle among others: review of conceptual drawings at the proposal stage and thereafter shop drawings for the construction stage and as-built drawings for the handing over phase.

LIGHT MOON is a dynamic company and can adapt to the ever changing and growing needs of our cusomers by providing value-engineering and redesign services that results in cost saving without compromising performance, quality and safety. Our engineering team has successfully implemented various value engineering works which was highly appreciated by our customers and consultants.

CONSTRUCTION

LIGHT MOON's expertise in construction has been demonstrated through its successful completion of landmark complex projects on time according to the required specifications.

LIGHT MOON assumes total responsibility for the planning, engineering, procurement, construction, testing and commissioning of a fully-equipped facility ready for operation on turnkey, which may include a combination of electrical and mechanical.

Adequate resources, years of experience in the Middle East, proactive and dynamic management contributed towards our success in delivering projects to the satisfaction of our valued clients.

Leveraging of resources through formation of joint ventures, subcontracting and excellent relationship with banks has broadened our construction and financial resource horizon and capability.

CORE VALUE

Light Moon is committed to upholding the highest standards of project management to ensure customer satisfaction, workplace safety, and superior project quality. The company operates under the strategic guidance of its shareholders, whose extensive experience in the construction industry provides a strong foundation for excellence, reliability, and sustainable growth.
